

Math 465

Mathematical Statistics

Day 1 – Introduction and review of Sets

Introductions

Please turn in a card with

- Your official name
- Your preferred name
- Your major
- Whether or not you are interesting in programming to solve probability problems in this class
(Yes = interested, No = not interested)
- Draw a picture of yourself if I don't know you **or** if I already know you, tell me one thing I should do in this class

Syllabus and website

Let's play a game

Pair up with someone you **don't** know.

Think of a number (any number)

When you both have a number in mind, reveal your numbers to each other.

If your numbers match, you win! If not, you lose 😞

Overview of Class

Focus on the mathematical tools needed to solve statistics problems,
not the context

[Suramin and Autism](#)

May 2017

A small, randomized clinical trial showed that a single intravenous dose of the century-old drug suramin transiently improved core symptoms of autism spectrum disorder (ASD).

Study Results

10 children with Autism were randomly assigned to new treatment or not.

Of the 5 who received the new treatment, 5 recovered.

Of the 5 who didn't receive the new treatment, 5 didn't recover

Review of sets: appendix C
